

# God's Anger

Mount Ararat of Noah's Ark has an elevation of 3,896 m/12,782 ft.

Earth's surface area covered by land is 57,491,000 square miles, Earth's surface area covered by water 139,397,000 square miles for a total of 196,888,000 square miles. Mechanical plumbing designers usually calculate for a rain fall of 10 inches per hour.

Lest assume at 10,560 foot (2 mile) elevation, Noah's Ark came to rest. Now we can calculate that there is 393,776, 000 cubic miles of volume space between where the Ark may have come to rest and today's current sea level of "0" feet.

Lest also assume that it rained at a 12 inch per hour rate across the entire face of the planet, a miracle in itself. But lest assume so. This rain fall rate would equal 1 foot per hour or 1/5,280<sup>th</sup> of a mile per hour rise in water level.

According to writings, it rained for forty dollars and forty nights. That total in hours for forty days would be 960 hours.

To raise the surface elevation of the water across the planet 10,560 feet in 960 hours would have require a rainfall rate of 11 feet per hour across the entire face of the planet, another miracle in itself.

But lest assume the calendar timeframe is not how we see it based on 24 hours a day for a predicted 1 foot rainfall rate to achieve a rise in

elevation of 10,560 feet in a day but would reference a 264 hour day resulting in a factor of 11.

With extrapolating a factor of 11 we could suppose that 40 days would be by current calendar 704 days, nearly two current calendar years. Additionally surmising that it rained an area of 25% of the total planet's surface area, two current calendar years would have extended to nearly 8 years.

In purely speculating, is it possible that humankind did not perish by drowning but by that of famine? For as the water rose, humanity may have had time to flee to higher ground but the fields and farms left behind would have been underwater and not provided the fruits of nourishment. Death by starvation, the inhumanity!!!

Therefore, as God said he would not flood the Earth again, could we see that as God will not let his children starve to death?

**If so, why are there certain members of the United States Congress that want to restrict and deny food to the hungry whereas the government has allowed for feeding the hungry?**

**Maybe one should not vote for those that vote for hunger in this coming election.**

**Choose Wisely**
